Press Release – for immediate release

Fibre Optic Break Out Boxes now available from System Connections

System Connections (Cambridge) has extended its existing range of cable assemblies and enclosures to include Fibre Optic Break Out Boxes. With provision for a variety of connector styles including: ST; SC (Simplex & Duplex); SC APC; LC (Duplex); MTRJ, FC & FCAPL, these break out boxes

provide the hub where connections can be changed simply and efficiently enabling networks to be modified or upgraded when required. Each unit is suitable for multi-mode or single-mode use and comes complete with adaptors tailored for the relevant mating connector pairs. Manufactured in the UK from 18 swg mild steel finished in white or grey powder coatings, these wall mounted break out boxes offer options of single or double lockable doors giving a capacity from 4 up to 48 ways. Installation is simplified by the provision of a variety of wall fixing holes and 20mm cable entry holes. 19" rack mounted versions complete the range. Available for immediate supply, these new enclosures complement System Connections' comprehensive range of Fibre Optic cable, connectors, patch leads, media convectors, attenuators and other accessories.
